

testimonial

"We were impressed with Klick's functional teacher's storage wall design which has greatly enhanced our new classroom block. The spacious storage area behind the white board cupboard doors conceals equipment and materials leaving the rest of the rooms clutter free. There is ample shelving for books on either side of the central whiteboard. Klick sourced special colours to match our existing scheme to complete a truly bespoke installation."

Graeme Beattie - Business Manager, Penrice Community College Academy, St Austell, Cornwall

3D visualisation of room

Detachable whiteboard

Dry wipe whiteboards

Base storage cupboards

Installation of bespoke teaching walls and furniture for

Penrice Community College, St Austell

Installation of teaching walls for 6 classrooms, shelving for 2 store rooms and benching for 1 workroom

Value: £54k

Client: Midas Construction, Cornwall

Architect: Kendall Kingscott, Exeter

Duration of works: 1 week

Project Details:-

- > Development of bespoke furniture design
- > Manufacture of furniture
- > Delivery and distribution of furniture on site
- > New furniture installed
- > Builders clean

Klick Technology worked closely with architects Kendall Kingscott to develop the bespoke teaching wall design. Several 3D visualisations were submitted until the design was finalised. The brief was to keep clutter to a minimum in the new classroom block, creating a functional storage area and clear work space at the front of the room.

The design also hides a variety of services which can be accessed from the base cupboards. In addition, the central interactive whiteboard can be easily removed to allow access to the service connections. The projector is mounted directly onto the furniture.

The furniture is constructed from robust laminated MDF which was matched to the school's existing colour scheme. Each classroom was supplied with a teacher's bench and co-ordinating loose tables with silver/grey pinboards to complete the room.
