

“We have worked with Klick at Reaseheath College on two projects and their design support was great on both occasions. They proved to be the best value for money and the college were very happy with the quality of the finished product.”

David Allen - Managing Director, David Allen Associates Ltd, Gloucester.

Teacher's demonstration bench

Serviced bollard

Perimeter Trespa benching with lime doors.

Cranked island layout with light blue doors

PROJECT BRIEF

Reaseheath College is a land-based further and higher education college offering a wide range of courses including agriculture, construction and animal management. The college were looking to completely revamp their science department, to improve the functionality and inject life and colour into their labs.

THE RESULTS

Klick worked closely with David Allen Associates. Their close understanding of the college's requirements and our technical knowledge of science laboratories combined to create a good working partnership. Klick suggested a number of design proposals which were reviewed by the college and then refined to create the final layouts.

The college opted for a combination of cranked island & bollard layouts, depending on the room dimensions. Trespa worktops were selected for their durability and lime/ light blue doors added colour to create a bright and appealing environment for study.

Klick's installation team worked closely with the main contractors on both phases of the project and the college were impressed with the dramatic improvement to the labs.

PROJECT DETAILS

- Production of 2D layouts & 3D visualisations
- Pre-installation survey
- Close liaison with M & E contractors
- Manufacture of furniture
- Supply & installation of fume cupboards
- Delivery and distribution of furniture on site
- Dedicated project manager
- Installation of all fitted furniture
- First fix, final connections, commissioning and certification

PROJECT DESCRIPTION

2 phase installation of furniture for 4 science labs, 3 preps/autoclave

VALUE

£101k

CLIENT

David Allen Associates, Gloucester

MAIN CONTRACTOR

Pochin / Nova Plus

DURATION OF WORK

5 weeks phased installation
