

testimonial

"Klick Technology helped Sussex Coast College, Hastings throughout the entire fitout process from design to installation at our new flagship College. They clearly understood our requirements and helped solve problems and issues as they arose throughout the process. We are now looking forward to working with Klick again on our second site, ready to meet our requirements from order to completion over the next 3 months. I would unreservedly recommend Klick to anyone as a capable and reliable supplier of a quality product."

Adrian Rogerson - Project Director, Sussex Coast College, Hastings

- > Delivery and distribution of furniture on site
- > Installation of all fitted furniture
- > Final connections

Sussex Coast College is a prestigious £97 million state of the art campus development for sixth form students.

The brief for Phase 1 was to provide two contrasting labs, one to be contemporary with solid surface benching and the other using Iroko benching to create a more 'Darwinian' feel. Klick Technology developed the design of the rooms in conjunction with the college, the project manager and main contractor.

In Phase 2 a bespoke jewellery work bench was designed from 40mm Maple whilst Trespa benching was selected for the majority of the other workshops.
