

testimonial

"The designer listened extremely carefully to our ideas and constraints. He came up with several really creative options and then adjusted them as we thought of improvements. His patience and professional experience/expertise have resulted in a superb food tech room. It is perfect. Thank you so much."

Anne Guinea – Curriculum Leader for Design Technology

Induction hobs

Curved peninsular ends

Metallic doors & drawers

High gloss panels

- > Gas safety proving system installed with CO2 monitor
- > Final connections, commissioning and certification of all works

The school were looking for a design with real impact and they liked the look of professional kitchens featuring stainless steel. Functionality was also a major priority. From the many different design solutions presented the staff opted for the sleek look of silver dust Velstone with high gloss anthracite panels. Metallic doors with brushed aluminium handles were selected to co-ordinate and full height white hygienic splashbacks were fitted for easy maintenance.

Klick Technology also fitted the induction hobs which compliment the look of the room, have good safety credentials and are energy efficient. The extensive refurbishment project ran smoothly and the staff are delighted with the end result.
