

“Klick’s furniture has transformed our 40 year old labs and prep rooms from a dated old fashioned facility, to a modern, clean and inspiring work space that we are proud to showcase. This is our second project with Klick and we happily recommend them to others. They are highly professional and very helpful throughout the design and installation process.”

Judy Brinson – Business Manager, Bodmin College, Cornwall

‘Learning curve’ design

Central pod with underbench storage

Cranked island layout for 6th form lab

Store room with ‘Superstack’ tray units

PROJECT BRIEF

Klick initially provided a quotation package to support an application for funding from the Wolfson Foundation. The college were really pleased with their ‘learning curve’ lab installed by Klick 3 years earlier and wanted to replicate that design where possible.

THE RESULTS

The college successfully secured funds from Wolfson to assist with the financing of the project. Three of the labs were large enough for the ‘learning curve’ design whilst the cranked island design was selected for the fourth, smaller 6th Form lab. The staff were particularly happy with the finish of the Velstone work tops in the previous lab and so selected this material again for all of the rooms.

The existing three preps rooms were not being fully utilised and therefore it was decided to give each room a dedicated purpose. One was retained as a practical prep room, whilst the second was made into a store room and the third was fitted with a bag store area and used by staff as an office. The science department has been transformed with inspirational yet functional new labs.

PROJECT DETAILS

- Production of 2D layouts & 3D visualisations
- Pre-installation survey
- Close liaison with M & E contractors
- Manufacture of furniture
- Delivery and distribution of furniture on site
- Dedicated project manager
- Installation of all fitted furniture

PROJECT DESCRIPTION

Installation of furniture for 4 science labs and 3 prep rooms

VALUE

94k

CLIENT

A. D. Williams Building Contractors, Cornwall

DURATION OF WORK

4 weeks
