

# Laboratory Furniture for UK Division of Molecular Diagnostics Company - Hologic, Inc

“Klick Technology were very well organised despite a relatively short lead-in time. Their fitters worked to a high standard on site and worked well with other trades. The main contract was completed one week prior to the deadline and we would have no hesitation in recommending them for future projects.”

Graham Pomfret - Senior Architectural Designer, Boulting Environmental Services Ltd

Mobile under bench cabinets

Access hatch to adjacent laboratory

PVC sink screen

Perimeter benching with Trespa worktops

## PROJECT BRIEF

Hologic is a molecular diagnostics company with headquarters in San Diego, California. The client wanted to redevelop their existing laboratories in Manchester as part of an expansion of the company’s European operations.

## THE RESULTS

Klick worked closely with Boulting Environmental Services and the UK branch of Hologic to determine the requirements for the lab furniture. Hologic stressed the importance of maximising the laboratory storage space and maintaining the highest levels of cleanliness throughout the testing facility.

### Bespoke Laboratory Storage

Klick developed bespoke laboratory storage units and with some careful planning incorporated existing storage systems into the modifications of the room. Our designers were involved in close liaison regarding the specification of the furniture and matching the colour to an existing scheme. Our team designed island and perimeter units with shelves underneath. These units were fabricated in Trespa because of its durability and scratch resistance.

### Mobile Lab Furniture

Mobile under bench cabinets were specified which allow greater flexibility within the laboratory as they can easily be relocated by the user with minimal disruption. As part of the project Klick also refurbished the pass through hatches with new doors. Despite additional work being added to the programme the site team still managed to stick to the already tight programme.

## PROJECT DETAILS

- Site survey
- 2D & 3D CAD drawings provided
- Design of furniture and layout
- Manufacture of furniture
- Pre-installation survey
- Planning meetings with BES & Hologic staff
- Renovation of some existing facilities
- Delivery and distribution of furniture on site
- New furniture installed

## PROJECT DESCRIPTION

Supply and installation of laboratory furniture for Molecular Diagnostics Company

## VALUE

£90k

## CLIENT

Boulting Environmental Services

## DURATION OF WORK

3 weeks
