Klick
Laboratories

We Build Labs

Founded over 35 years ago
Klick has maintained its core values as a family business whilst developing into a highly reputable and reliable provider of cutting edge laboratory furniture for a variety of disciplines including research, industrial, healthcare and university laboratories.

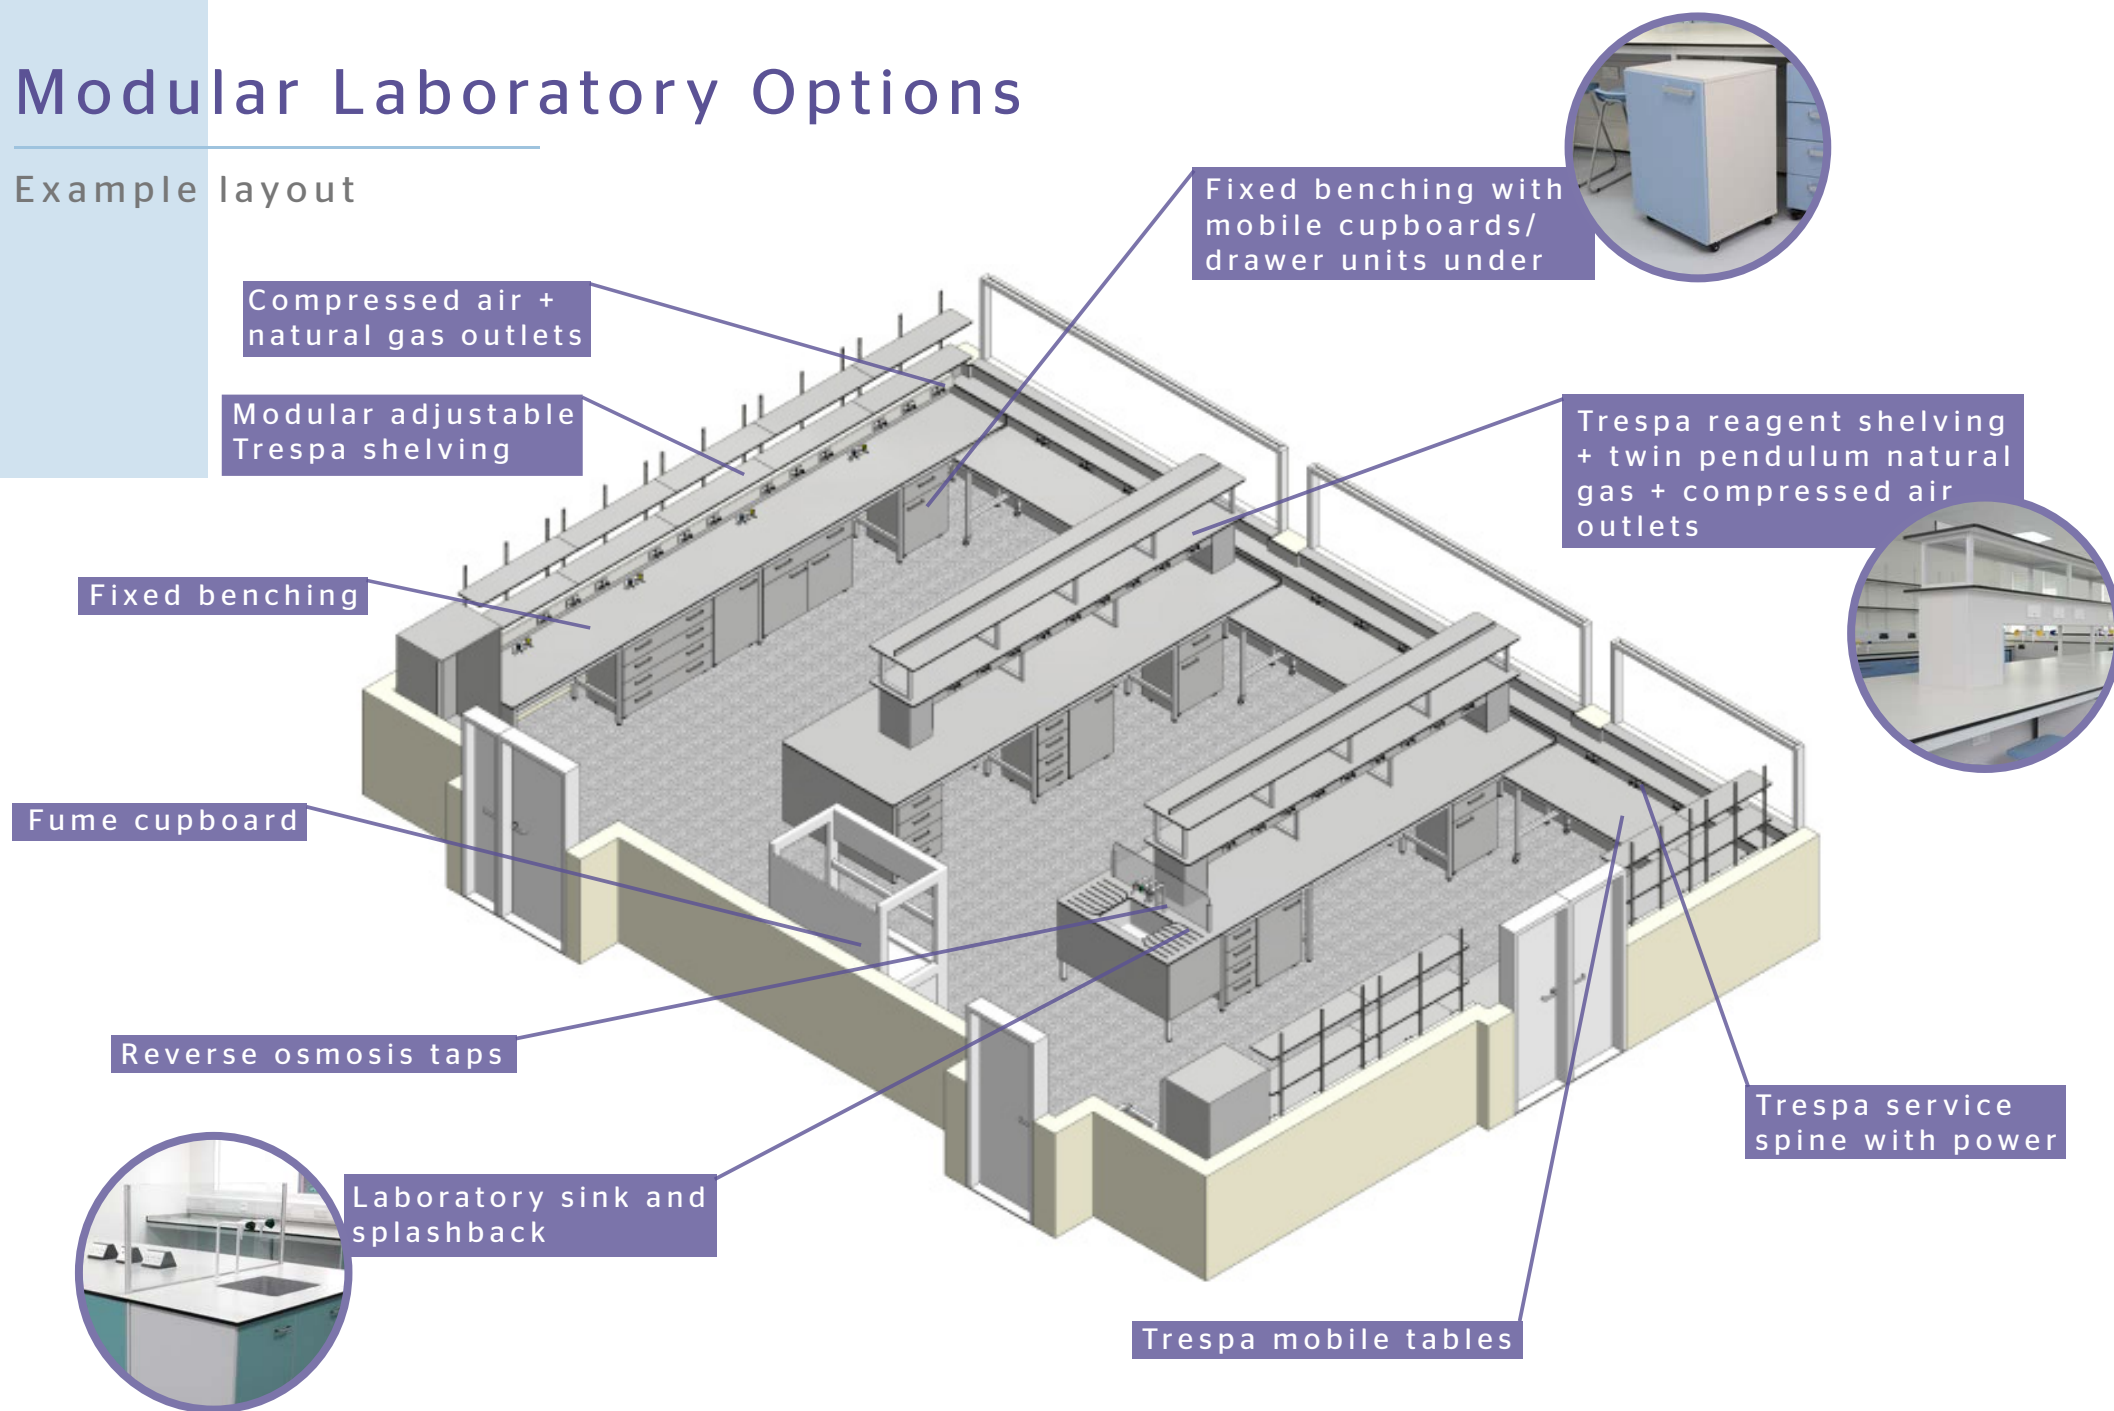

Our nationwide one stop shop solution offers the following benefits:

- Experienced designers and free design consultation - including 3D visuals
- Flexible service & UK manufacturing
- High calibre & proactive project management team
- Single point of contact throughout the project
- Robust and functional product design at an extremely competitive price
- Optional refurbishment service

This service offers reassurance to clients seeking the convenience of one point of contact.

Modular Laboratory Options

Example layout

Laboratory Design

High quality solutions tailored to your needs

Klick understand the demands that are placed on a busy lab and we design and fit furniture to meet those needs.

Our knowledgeable representatives will meet with you to understand how the laboratory runs day to day. This allows us to develop smart design solutions that will provide a streamlined and user-friendly workspace. We then make design suggestions and prepare a quotation for your consideration.

We can offer expert advice on the latest fittings and materials to create inspiring, state of the art laboratories, with functionality and flexibility as a priority.

- Over 35 years' experience in the design and installation of cutting- edge laboratory furniture
- Free design consultation with our laboratory expert to discuss your challenges
- Advice on layout and storage options to accommodate current processes, improve workflow and maximise efficiencies
- Latest Revit 3D visuals and walkthroughs to help you make the most informed decision - all free of charge
- Advice on HVAC and fume cupboards - our qualified engineers will assess your requirements and provide the perfect ventilation system for your lab
- Our furniture is robust and built to last - which avoids the need for frequent replacements and contributes to improved sustainability

Mobile Workstations

Including mobile furniture as part of your laboratory design will help to future proof the design, allowing for expansion in staff numbers or changes in processes.

Mobile Laboratory Furniture Solutions

Flexibility is key in a modern laboratory

Our mobile laboratory furniture systems have been designed to facilitate the changing needs of today's research and industrial laboratories.

Using modular cabinets and lab benching with flexible service solutions, it is possible to reconfigure your workspace with minimal disruption.

For maximum flexibility quick connect **service fittings** are available with a choice of outlet connections.

Nationwide Fit Out Service

Flawless furniture solutions

Klick offers a first class service from receipt of the order through to completion, which includes:

- UK manufacture - high quality products delivered to schedule and on budget
- One point of contact throughout the project - avoiding communication issues
- Our designers and project management teams work closely together throughout the project to ensure accuracy of information
- Quality checks prior to despatch from our manufacturing and distribution facility
- Highly skilled fitters who are CSCS registered
- Prompt snagging and thorough aftercare service

Clear and precise information on project deadlines and programming with proactive management and installation teams who work with you to minimise disruption.

Refurbishment

We Build Labs

“... After months of struggling to get quotes from various subcontractors and co-ordinate different workforces I came across Klick who were able to offer a complete service... Their sales department were able to knowledgeably discuss what was available and what they could offer Klick were able to tailor our workspace to exactly what we needed with suggestions and guidance on finishes and layout. The work was scheduled in for when was most suitable for us and was carried out with the minimum of fuss, on time and to budget...”

Alister Bull - Project Manager, EWB Solutions

Klick Technology is one of the UK's leading specialists in refurbishment services for laboratories.

Klick can provide a complete service - including design, using the latest Revit 3D drawings, UK furniture manufacture and a full turnkey refurbishment package - offering you the benefit of one point of contact throughout the project.

- Klick take full responsibility for all aspects of the project and co-ordination of the necessary contractors on site
- Our experience in planning laboratory refurbishments minimises time on site and room downtime
- Less drain on management resources
- Efficient management of time and tradesmen on site keeps costs down
- Advice on cost effective HVAC solutions
- Dedicated account manager from beginning to end of a project

Worktops

Tried and tested robust materials

When selecting your work surface, it is important to consider both the functionality and aesthetic appearance. Our designers can offer advice about the most suitable benching option for your design and laboratory function.

Trespa TopLab BASE is a non porous high-pressure compact laminate and is the ideal worktop material for laboratory and hospital environments.

Trespa TopLab PLUS is ideal for laboratory environments where hygiene and the avoidance of contamination are important. Trespa TopLab PLUS is resistant to harsh chemicals and can be easily disinfected.

Velstone is a 25mm solid surface material which is non porous and has a smooth seamless surface with aesthetic appeal.

Post Formed Laminate worktops can be supplied with an integral 50mm upstand, suitable for HTM63 environments.

“The Klick design team impressed us as they had the flexibility to work with BDP to find bespoke solutions... (Klick) refined the layouts for each of the laboratories and produced 3D CAD drawings to illustrate the new designs, giving us confidence in the final product. Their installation team were helpful and proactive throughout the project.”

Daniel Walder
Associate Architect, BDP

Recent Projects

Research Laboratory

Client: Science Park

The Project: Klick designed 2 new flexible research laboratories offering modern facilities to inspire new research talent and promote collaboration.

- Pre-installation survey
- Design of furniture & layout
- 2D & 3D drawings provided
- Design, fabrication & installation of IPS units
- Close liaison with site team
- Manufacture of furniture
- Installation of all fitted furniture
- Dedicated project manager

The Final Result: Self-contained units equipped with high quality furniture offering all the research facilities required for start up companies with additional mobile workstations to allow for expansion.

Recent Projects

York University Biology Department

Client: Interserve Construction

Architect: Race Cottam Associates

The Project: The University wanted each laboratory to have its own identity and special door colours were sourced for each room. Klick were appointed by Interserve and progressed efficiently through the university labs working with the site team, adapting to site conditions in order to adhere to the programme.

- Production of 2D layouts & 3D visualisations
- Product development
- Pre-installation survey
- Close liaison with M & E contractors
- Manufacture of furniture
- Delivery and distribution of furniture on site
- Installation of all fitted furniture
- Dedicated project manager

The Final Result: Klick delivered a cost effective package resulting in a suite of modern and colourful labs to inspire 21st century learning.

Recent Projects

Pathology Laboratory

Client: Veterinary Diagnostic Company

The Project: The priority was to provide the client with a hygienic environment suitable for a pathology laboratory with specialist furniture and bespoke worksurfaces. The client also needed to maximise workstations and provide ample workspace for the whole team.

- Pre-installation survey
- Design of furniture & layout
- 2D CAD drawings provided
- Design & installation of seamless worktop/coving
- Sourcing of bespoke rinse sinks & fittings
- Close liaison with site team
- Manufacture of furniture
- Installation of all fitted furniture
- Dedicated project manager

The Final Result: Velstone worktops were selected which are ideal for a sterile environment and provided a continuous seam free surface with coved upstand.

Bespoke features included an oversized stainless steel sink with rinse grids and Velstone splash guards.

Why choose Klick?

We Build Labs

- Our designers are dedicated to innovation and creating bespoke solutions to ensure we surpass clients' expectations
- We future proof your lab design, building in flexibility to allow for expansion, which is key in a fast moving industry
- We believe in relationships; our clients have one point of contact from beginning to end of a project
- The quality of all of our laboratory installations is of paramount importance to all our employees
