

“Klick’s wide-ranging experience, competitive pricing and track record on similar projects gave us the reassurance that they would perform to expectations – and they did. Their designers presented mood boards which helped with the decision making process and illustrated their broad experience. Working relationships between the school’s site team and Klick staff were positive and their responses to any queries were always prompt and efficiently dealt with. The level of communication was good throughout the project with regular updates on progress and site attendance. As a result of Klick’s pro-active management the whole refurbishment process was made a positive one. We are impressed with the quality of the installation and the complete transformation of the labs into bright and modern spaces which are much appreciated by all the staff and students.”

Chris Fisher - Business Manager, Slough and East Berkshire CofE Multi Academy Trust

New lab with peninsular benching/Trespa work tops

Teacher’s desk with purple KI Postura+ Stools

Teaching wall with sliding whiteboards/shelving

Storage cupboards to the rear of the benching

PROJECT BRIEF

The school were looking for a company to provide a full science lab refurbishment service with a cost effective solution to remodel their outdated science block. The aim was to transform the rooms into inspirational modern labs, with improved layout and storage provision.

THE RESULTS

Klick worked closely with the senior leadership team and the teaching staff in order to understand the requirements of the school.

Design Consultancy for Laboratory Refurbishment

At the initial stages our designers presented moodboards to illustrate the new teaching environment. The school were looking for a clean and contemporary look and selected a neutral colour scheme for the furniture with contrasting purple stools. Teaching walls were included to provide a focal point and extra storage space at the front of the labs.

Refurbishment of Science Labs

Before work could start on the labs the external drainage had to be upgraded. Doorways were relocated in order to make space for the new teaching walls and the floors were chased to allow for the new location of the services. There was minimal snagging, which was promptly addressed, and the school were very happy with the service and the end result.

PROJECT DETAILS

- Free comprehensive design and consultation service
- 2D & 3D CAD drawings provided
- Full project management service
- Removal of existing furniture
- Relocate doorways
- External drainage upgraded and floors chased
- Remove existing circuit board/ electric heaters & relocate
- Installation of new plumbing and electrical services
- Supply & installation of new mobile fume cupboards/docking points
- New flooring & decoration throughout
- Provision for interactive services
- Supply and installation of furniture
- Gas safety proving systems installed with CO2 monitors
- Final connections, commissioning and certification of all works.

PROJECT DESCRIPTION

Full refurbishment of 6 science labs & a prep room

VALUE

£268k

CLIENT

Slough & Eton C of E Business & Enterprise College

DURATION OF WORK

14 weeks
